Foreword

This section of the service manual contains specific details for the NPW-2 handportable telephone variants.

The chapter contains an exploded view of the NPW-2 variants including a list of assembly parts covering the system module and the display module.

Note: The Service Manual is intended for use by qualified service personnel only.

Note: When assembling the B-cover screws, use 17 Ncm torque.

Transceiver NPW-2NX (6360)

This phone is a dualband version designed for TDMA markets.

Unit/type	Product code	Description
